

# **Workshop on Information Requirements and Mobile Commerce**

Copenhagen IT University, 5 October 2004

**Jan Trzaskowski**  
Copenhagen Business School

# Code as law

What is the idea of code as law?

How is the architecture of mobile commerce different from that of the Internet?

How can the architecture be applied to avoid spam?

# Information requirements and mobile commerce

What are the general problems in connection with information requirements and where can we find solutions?

Examine the mobile commerce solutions at [www.e-tones.co.uk](http://www.e-tones.co.uk), [www.jamster.co.uk](http://www.jamster.co.uk) and [www.jamba.dk](http://www.jamba.dk) (in Danish). Do the solutions fulfill the necessary information requirements?

# The E-Commerce Directive.

What is the purpose of the directive?

What is the scope of application?

What is an information society service?

What is the content and purpose of articles 4-6 and how can the information requirements be satisfied in mobile commerce?

What is the content and purpose of articles 9-11 and how can the requirements be satisfied in mobile commerce?

# The Distance Selling Directive.

What is the purpose of the directive?

What is the scope of application?

What is distance contract?

What is the content and purpose of articles 4-5 and how can the information requirements be satisfied in mobile commerce?

What is the content and purpose of the right of withdrawal and how can it be applied in a mobile commerce solution?

# Thank you for your attention!
